**For Immediate Release**

### Groundbreaking Ceremony Kicks Off Construction of New City Hall

All are invited to join the City of Waukesha as the City breaks ground on a new City Hall facility on Tuesday, September 17 from 6-6:30pm. The ceremony will be held on the construction site at 201 Delafield Street near the corner of Delafield Street and Buena Vista Avenue. The construction site is located next to the current City Hall building. Mayor Reilly, City Administrator Kevin Lahner, representatives from the architectural firm BWBR, and representatives from the contractor Greenfire Management Services will speak at the event.

Construction activities will begin on the new City Hall starting Monday, September 16 with the installation of construction fencing and tree removal. The current City Hall will remain open and operational until the new building is completed. During the construction, all visitors to the City Hall building will need to park in the upper level parking lot off Buena Vista Avenue and utilize the upper level doors off the parking lot to access the building. The current lower level parking lot and lower level doors are part of the construction site and will not be accessible to the public after September 16.

The new City Hall is expected to be completed by January 2021 and will correct safety and operational concerns that are present in the current building. The new building will also bring the City Hall and City Hall Annex employees into one building to provide a more centralized location for residents to interact with the City.

Construction updates will be provided each week on the City's website: <https://waukesha-wi.gov/1852/City-Hall-Construction>
