WAUKESHA PONDS/BMP WORKSHOP

*Storm Water Systems
Maintenance*

The **City and County of Waukesha** invite you to attend this workshop to help HOAs, property owners and managers understand how to maintain their storm water systems including Wet Ponds, Infiltration Basins, Swales, etc.

Does your pond spark joy?

Storm water systems can add unique benefits to your property. Regular maintenance of these facilities can extend their longevity and reduce repair costs by thousands of dollars over their life cycle.

PRESENTATION TOPICS:

- **Budgeting for Maintenance**
- **History of ordinances and laws** regarding storm water control
- **DIY vs Professional Inspections**
Which work can be performed by residents and when to hire a professional
- **Common Concerns**
Establishing foundational knowledge about your pond or “BMP” (Best Management Practice – a structural method of treating and controlling storm water within the City)

*Enter for a chance to win a **Rain Barrel** with diverter kit, an \$84 value!*

(Must be present to win)

The presentation is expected to last one hour with time for questions at the end.
